

Rithish S

DevOps Intern | Cloud Infrastructure, Kubernetes, Docker, Linux & CI/CD

+91 99522 52304 | rithishcodespace@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

EDUCATION

Bannari Amman Institute of Technology

Bachelor of Engineering in Computer Science and Engineering

CGPA: **8.28/10**

Sathyamangalam, Tamil Nadu

Aug. 2024 – May 2028

TECHNICAL SKILLS

Cloud & DevOps: Docker, Kubernetes, Prometheus, Grafana, AWS (EC2, S3, IAM, VPC), GitHub Actions, Nginx

Scripting & Languages: Python, Bash/Shell, Go, TypeScript, JavaScript, SQL, C++, Java

Distributed Systems & Queues: Redis (Distributed Queues & Locks), BullMQ, REST APIs, Microservices, k6

Systems & Security: Linux (System Administration, POSIX), Computer Networks (TCP/IP, DNS, TLS), AES-256-GCM, Git

Certifications: AWS Cloud Practitioner Essentials, Oracle Cloud Foundations Associate, Cisco Linux Unhatched

EXPERIENCE

Web Developer

Feb. 2025 – Dec. 2025

Students Special Group

Student Organization

- Engineered full-stack internal management portals with React, Node.js, and MySQL, ensuring high availability and automated workflows for faculty operations.
- Designed and implemented secure REST APIs and normalized relational schemas for a Faculty Dashboard to optimize query throughput and data consistency.
- Mentored **50+** students in Linux command-line workflows, backend development, containerization, and software engineering best practices.

DEVOPS & CLOUD PROJECTS

DB Backup CLI (DBVault) | *TypeScript, Node.js, Redis, BullMQ, AWS S3, Docker* [GitHub](#)

- Architected an automated disaster-recovery backup CLI published on npm and Docker Hub with **120 passing automated tests** across PostgreSQL, MySQL, MongoDB, and SQLite.
- Designed a distributed job-processing system using Redis and BullMQ with configurable worker concurrency and queue limits to scale backup workloads reliably.
- Implemented AES-256-GCM encryption, local key rotation, and Redis-based distributed locking; integrated cloud storage adapters for automated offloading to **AWS S3**.

K8s Cluster Observability & CI/CD | *Kubernetes, Docker, Prometheus, Grafana, GitHub Actions, Linux* [GitHub](#)

- Containerized microservices with Docker and deployed them to Kubernetes clusters using declarative **deployment.yaml** and **service.yaml** manifests for automated pod provisioning.
- Built an end-to-end observability pipeline deploying **Prometheus** metric scraping and **Grafana** dashboards to monitor pod health, request latencies, and cluster resource utilization.
- Configured container health probes (liveness/readiness), automated pod self-healing, and GitHub Actions CI/CD workflows for automated build and test pipelines.

OPEN SOURCE

ESLint | *JavaScript, AST, Static Analysis, IEEE 754, CI/CD* [PR #21218](#)

- Contributed a merged fix to ESLint's **no-loss-of-precision** rule, distinguishing genuine zero literals from non-zero decimals that underflow under IEEE 754 binary64.
- Added regression tests covering underflow, subnormal values, signed zero, and non-decimal literals; passed **43 CI checks** before merge into a major open-source codebase.

ACHIEVEMENTS

- 1200+ DSA Problems Solved** across LeetCode, CodeChef, and GeeksforGeeks, spanning arrays, graphs, trees, and dynamic programming.
- IEEE DevSpark Hackathon Winner** – Secured **1st place among 120+ teams** in Full Stack Development by building Plantera, an AI-powered environmental monitoring application.
- BIT Hackathon Winner** – Secured **1st place among 200+ teams** by architecting a full-stack Leave Management System under hackathon time constraints.
- Official Cloud Certifications** – Certified in **AWS Cloud Practitioner Essentials** and **Oracle Cloud Infrastructure Foundations Associate** (2025).
